

AICAP - CEB SYMPOSIUM - Rome, May 1979**STRUCTURAL CONCRETE UNDER SEISMIC ACTIONS - Structures en beton sous actions sismiques****Volume 1- STATE OF THE ART REPORTS**

Theme Ia	Mechanical properties of steel under load cycles idealizing seismic actions	Ben KATO, University of Tokyo, Tokyo, Japan	a005
Theme Ib	Mechanical properties of concrete under load cycles idealizing seismic actions	Hiroyuki AOYAMA, University of Tokyo, Tokyo, Japan	a029
Theme Ic	Properties of bond between concrete and steel under load cycles idealizing seismic actions	Theodosios P. TASSIOS, National Technical University Athens, Greece	a065
Theme II	Seismic behaviour of structural concrete linear elements (beams, columns), and their connections	Vitelmo V. BERTERO University of California Berkeley, Calif., USA	a123
Theme III	Seismic behaviour of structural concrete two-dimensional elements (Shear walls and others).	George SERBANESCU, Institutul de Cercetari in Constructii si Economia Constructiilor, Bucharest, Roumania	a213
Theme IV	Seismic behaviour of concrete structures: observation of actual structure and laboratory tests	Giuseppe GRANDORI, Polytechnic of Milan, Italy	a245
Theme V	Recommendations for the design and construction of concrete structures in seismic regions.	Julio FERRY BORGES, Laboratorio Nacional de Engenharia Civil, Lisbon, Portugal	a263

Volume 2 - TECHNICAL PAPERS

Theme I

	Force-strain relationship of reinforcing bars embedded in concrete under reversed loadings	S. MORITA, T. KAKU, E. SUDO	b005
	Behaviour of concrete under low cycle repeated loadings	V. CERVENKA	b015
	Effet des actions de type sismique sur la résistance et déformabilité des betons	L.J. LIMA	b021
	New data on seismic properties of aerated concrete	V.V. MAKARICHEV, O.P. VINOKUROV	b029
	Study on improving the flexural and shear deformation capacity of concrete member by using lateral confining reinforcement with high yield strength	H. MUGURUMA, F. WATANABE, H. TANAKA, K. SAKURAI, E. NAKAMURA	b037
	Confinement effects of reinforcement of reinforced concrete elements under cyclic loading	S. SACHANSKI, I. PASKALEVA	b045
	Properties of concrete confined by rectangular ties	S.A. SHEIKH, S.M. UZUMERI	b053
	Reliability in the concrete-steel bond strength under repeated actions	M. COLLEPARDI, M. CORRADI, M. VALENTE	b061
	Bond and splices in reinforced concrete for seismic loading	P. GERGELY, F. FAGUNDO, R.N. WHITE	b069
	Sliding shear and dowel forces in cracked reinforced concrete subjected to seismic loading	R.N. WHITE, P. GERGELY, R. JIMENEZ	b077
	Preliminary results of local bond-slip relationships by means of moire method	T.P. TASSIOS, E.G. KORONEOS	b085

Theme II

	Analytical study of r/c material hysteresis	A.E. AKTAN, U. ERSOY	b097
	Numerical studies of the behaviour of a reinforced concrete beam element under repeated loadings	D. CAPECCHI, V. CIAMPI, F. VESTRONI	b105
	Ductilité de poteaux en flexion composée sous charges alternées	M. KAVYRCHINE, A. GRELAT	b115
	Study of the bending behaviour of reinforced concrete columns under changing axial force	S. MAY ASMI, S. KOKUSHO, E. TERAMOTO, T. OSANAI	b125
	The influence of axial load on the response of columns under bidirectional loadings	H. RAMIREZ, J.O. JIRSA	b133
	Inelastic behaviour of reinforced concrete members subjected to bi-axial bending moments	K. KOBAYASHI, S. KOKUSHO, K. TAKIGUCHI .	b141
	Behaviour of reinforced concrete columns under simulated Biaxial earthquake loads	S. OTANI, V. WAI-TO CHEUNG	b149
	Experimental studies of ultimate shear strength and deformation capacity in reinforced concrete members with high tension shear reinforcement	M. FUKUHARA, S. KOKUSHO, T. EIGAWA	b157
	Shear effects on plastic hinges of earthquake resisting reinforced concrete frames	T. PAULAY , I. N. BULL	b165
	Rotational capacity of plastic hinge in reinforced lightweight concrete beams	I.TERTEA, T. ONET	b173
	Reinforced concrete beams under reversed cyclic torsional loading	M. P. COLLINS, S. CHOCKALINGAM	b181
	Study on low-cycle fatigue strength of post-tensioned unbonded prestressed concrete beams	H. MUGURUMA	b189
	Once repeated loading of prestressed concrete beams	V. URBAN	b197
	Ductility of prestressed lightweight aggregate concrete	I.TERTEA, V. PACURAR	b205
	Beam-column subassemblages tested under alternated loads for seismic design	E. CANSADO CARVALHO	b213

	Titolo	Autori	Pag
	The behaviour of beam-column joints under bidirectional load reversals	S.T. BURGUIERES, J.O. JIRSA, J.E. LONGWELL	b221
	Ductile behaviour of joints in precast members assembled by means of prestressing under cyclic loading	J. I. ALVAREZ BALERIOLA, H. CORRES PEIRETTI, R. FERNANDEZ SANCHEZ	b229
	Experimental study on the behaviour of reinforced concrete bridge piers under seismic alternating loads	Y. OZAKA, M. ONTA	b237
	Test on reinforced concrete members repaired following different techniques after heavy damage	A. SAMUELLI FERRETTI	b245
	Repeated-loading experiments on R.C. elements rehabilitated with rheoplastic mortar	G. AUGUSTI, F. FOCARDI, E. MANZINI, M. VALENTE	b253
Volume 3 - TECHNICAL PAPERS			
Theme III	Non-linear analysis of reinforced concrete shear walls	L. CEDOLIN, A. MIGLIACCI, S. LEVATI	c007
	Low cycle behaviour and strength of precast connections	A. ASWAD	c019
	Energy dissipation in panelized buildings using limited-slip bolted joints	A.S. PALL, C. MARSH	c027
Theme IV	Study on hysteretic behaviour of statically indeterminate prestressed concrete trame structure subjected to reversed cyclic lateral load	H. MUGURUMA	c037
	Waffle fiat plate-column connections under alternating loads	R. MELI. M. RODRIGUEZ	c045
	The seismic analysis, theoretical and experimental, of the joints of prestressed concrete frames	A. NEGOITA, V. HOBJILA	c053
	Le comportement sismique "in situ" des hauts bâtiments avec un noyau central et des portiques périphériques	A. NEGOITA, I. OLARIU, I. NEGOITA	c063
	Observed seismic behaviour of various concrete structures	Y.OZAKA, M. I'ZUMI, T. SHIGA	c071
	The Myagi-Ken-Oki, Japan, earthquake of June 12, 1978: effects on reinforced concrete structures	J. A. BLUME, P. I. YANEV	c079
	An economic analysis for retrofitting a reinforced concrete building	A. MONSEY	c087
	A survey on the collaps of a three-storey reinforced concrete framed structure during the Tangshan earthquakes	W. LIAN, D. GUO-YONG	c095
Giornata A.I.C.A.P. - Roma, AULA DEL SINODO, 24 maggio 1979			
EVOLUZIONE DEI CODICI SULLA CONCEZIONE, CALCOLO ED ESECUZIONE DELLE OPERE IN C.A. E C.A.P.			
	Introduzione al tema	C. Cestelli Guidi	N79-11
	Il problema del controllo della sicurezza nella evoluzione del codici	A. Giuffrè	N79-11
	Metodi di misura della sicurezza: stati limite ultimi	E.F. Radogna	N79-09
	Metodi di misura della sicurezza: stati limite di esercizio	M.A. Chiorlno	N79-12
	Materiali: Il conglomerato	R. Calzona	N79-09
	Acciaio da cemento armato e da cemento armato precompresso	L. Sanpaolesi	N79-12
	Criteri esecutivi e controlli	A. Migliacci	N80-1
