

BULLETIN D'INFORMATION
N° 132

AICAP - CEB Symposium

Rome, Mai 1979

STRUCTURES EN BETON SOUS ACTIONS SISMIQUES
STRUCTURAL CONCRETE UNDER SEISMIC ACTIONS

Volume 2 - Technical Papers
Contributions techniques

Avril 1979

UNDER THE PATRONAGE
OF THE MINISTRY OF PUBLIC WORKS OF ITALY

SOUS LE PATRONAGE
DU MINISTERE ITALIEN DES TRAVAUX PUBLICS

COPATRONAGES:

(A.C.I.) American Concrete Institute
(E.A.E.E.) European Association for Earthquake Engineering
(F.I.P.) Fédération Internationale de la Précontrainte
(I.A.E.E.) International Association for Earthquake Engineering

ORGANIZING COMMITTEE
COMITE D'ORGANISATION

Carlo CESTELLI GUIDI	President of A.I.C.A.P. Président de l'A.I.C.A.P.
Julio FERRY BORGES	President of C.E.B. Président du C.E.B.
Yves SAILLARD	Deputy President of C.E.B. Président Délégué du C.E.B.
Antonino GIUFFRE'	Professor, University of Rome Professeur à l'Université de Rome
Marco MENEGOTTO	Professor, University of Rome Professeur à l'Université de Rome
Paolo Emilio PINTO	Professor, University of Rome Professeur à l'Université de Rome

INDEX

Volume 2

TECHNICAL PAPERS
CONTRIBUTIONS TECHNIQUES

Theme I

1°	Force-strain relationship of reinforcing bars embedded in concrete under reversed loadings S. MORITA, T. KAKU, E. SUDO	Page	5
2°	Behaviour of concrete under low cycle repeated loadings V. CERVENKA		15
3°	Effet des actions de type sismique sur la résistance et déformabilité des bétons L. J. LIMA		21
4°	New data on seismic properties of aerated concrete V.V. MAKARICHEV, O.P. VINOKUROV		29
5°	Study on improving the flexural and shear deformation capacity of concrete member by using lateral confining reinforcement with high yield strength H. MUGURUMA, F. WATANABE, H. TANAKA, K. SAKURAI, E. NAKAMURA		37
6°	Confinement effects of reinforcement of reinforced concrete elements under cyclic loading S. SACHANSKI, I. PASKALEVA		45
7°	Properties of concrete confined by rectangular ties S.A. SHEIKH, S.M. UZUMERI		53
8°	Reliability in the concrete-steel bond strength under repeated actions M. COLLEPARDI, M. CORRADI, M. VALENTE		61
9°	Bond and splices in reinforced concrete for seismic loading P. GERGELY, F. FAGUNDO, R. N. WHITE		69
10°	Sliding shear and dowel forces in cracked reinforced concrete subjected to seismic loading R. N. WHITE, P. GERGELY, R. JIMENEZ		77
11°	Preliminary results of local bond-slip relationships by means of moiré method T.P. TASSIOS, E.G. KORONEOS		85

Theme II

1°	Analytical study of r/c material hysteresis A.E. AKTAN, U. ERSOY		97
2°	Numerical studies of the behaviour of a reinforced concrete beam element under repeated loadings D. CAPECCHI, V. CIAMPI, F. VESTRONI		105
3°	Ductilité de poteaux en flexion composée sous charges alternées M. KAVYRCHINE, A. GRELAT		115

4°	Study of the bending behaviour of reinforced concrete columns under changing axial force S. HAYASHI, S. KOKUSHO, E. TERAMOTO, T. OSANAI	Page 125
5°	The influence of axial load on the response of columns under bidirectional loadings H. RAMIREZ, J.O. JIRSA	133
6°	Inelastic behaviour of reinforced concrete members subjected to bi-axial bending moments K. KOBAYASHI, S. KOKUSHO, K. TAKIGUCHI	141
7°	Behaviour of reinforced concrete columns under simulated Biaxial earthquake loads S. OTANI, V. WAI-TO CHEUNG	149
8°	Experimental studies of ultimate shear strength and deformation capacity in reinforced concrete members with high tension shear reinforcement M. FUKUHARA, S. KOKUSHO, T. EIGAWA	157
9°	Shear effects on plastic hinges of earthquake resisting reinforced concrete frames T. PAULAY, I. N. BULL	165
10°	Rotational capacity of plastic hinge in reinforced lightweight concrete beams I. TERTEA, T. ONET	173
11°	Reinforced concrete beams under reversed cyclic torsional loading M. P. COLLINS, S. CHOCKALINGAM	181
12°	Study on low-cycle fatigue strength of post-tensioned unbonded prestressed concrete beams H. MUGURUMA	189
13°	Once repeated loading of prestressed concrete beams V. URBAN	197
14°	Ductility of prestressed lightweight aggregate concrete I. TERTEA, V. PACURAR	205
15°	Beam-column subassemblages tested under alternated loads for seismic design E. CANSADO CARVALHO	213
16°	The behaviour of beam-column joints under bidirectional load reversals S.T. BURGUIERES, J.O. JIRSA, J.E. LONGWELL	221
17°	Ductile behaviour of joints in precast members assembled by means of prestressing under cyclic loading J. I. ALVAREZ BALERIOLA, H. CORRES PEIRETTI R. FERNANDEZ SANCHEZ	229
18°	Experimental study on the behaviour of reinforced concrete bridge piers under seismic alternating loads Y. OZAKA, M. OHTA	237
19°	Test on reinforced concrete members repaired following different techniques after heavy damage A. SAMUELLI FERRETTI	245
20°	Repeated-loading experiments on R.C. elements rehabilitated with rheoplastic mortar G. AUGUSTI, F. FOCARDI, E. MANZINI, M. VALENTE	253
